BY ROB. J. CULVERWELL, M. D., By ROB. J. CULVERWELL, M. D.,

The important fact that the awful consequences of self-abuse may be effectually removed without internal medicines or the dangerous applications of caustics, instruments, medicated bougies, and other empirical devices, is here clearly demonstrated, and the entirely new and highly successful treatment as adopted by the celebrated auther fully explained, by means of which every one is enabled to cure himself perfectly, and at the least possible cost, thereby avoiding all the advertised nostrums of the day. This Lecture will prove a boon to thousands and thousands.

COTTON-Some few loads of new cotton have been received during the past week, and some few single bale lots have also been received. There appears to be neither a disposition to buy or sell, and the principal transactions reported are for home factors, whose wants are comparatively small and readily supplied. We have no quotations to offer. THE CROP-So far as the Atlantic States are con cerned, the general impression scens to be that the crop will be from 150,000 to 200,000 bales less than fast year. If the crop is corresponding short in the Gulf States, and many persons seem satisfied that it

will be, there can be no doubt that the total crop of 1860-'61, will fall below that of 1859 and '60, not less than 800,000, and may reach 1,000,000 bales. It is too early to venture speculations about such a large defficiency in the crop, although it is well known that the crop has been very materially injured, and that the yield will be much less than last year, unless a large increase has been made in the land cuitivated and labor employed. We have no evidence that there has been any material increase in the number of acres planted, nor can we imagine where man additional laborers on the farm could have been of

tained.

The crop, unless we are greatly deceived, will not reach 4,000,000, and we shall be surprised to notice that it comes within several hundred thousand bales of that quantity. It is true, that early speculations about the extent of a cotton crop, are often made to appear very ridiculous, when the crop is brought to market; and such a result may occur in the yield of the present growing crop. The receipts at New Or-leans and Mobile, when the rivers are unvigable, and the weather and roads are good, often make cotton It will stimulate, strengthen, and invigorate you and cause the bloom of health to mount your cheek again. Every bottle is warranted to give satisfaction, dealers open their eyes with wonder, when cotton is daily borne to those ports in immense quantities, and in the face of previously reported short crops. We think, however, that this year there can be no mistake about the short crop. The experience of thousands daily proves that no preparation of Iron can for a moment be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable case. In all cases of female debility (fluor albus, chlorosis, etc.), its effects are delightfully renovating. No remedy has ever been discovered, in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use. As a grand stomachic and general restorative it has no superior and no substitute.
